(0)

Mental health is a key focus of managers in health and social care settings. Understanding employee wellbeing and mental health fosters more supportive working environments, increased employee retention, and improved team dynamics. This module will further your understanding of the impacts and challenges of staff wellbeing and mental health. You will explore various perspectives of health and care managers and staff, as well as develop practical transferable skills in managing staff mental health and wellbeing.

(0)

This module will introduce and explore evidence-based practice within the healthcare sector, including its utility in proposing treatments, improving outcomes, and prompting positive systematic change. You will have the opportunity to deliberate historical and current health issues and put forward your own ideas for improving patient health and well-being. You will also develop the skills to apply critical literature analysis, quantitative and qualitative data, and research to solve prominent healthcare issues.

(0)

New technologies are transforming and disrupting every corner of the health and care sector, enabling more efficient service delivery, faster and more accurate diagnosis, better treatment and patient outcomes, and much more. This module will provide you with a thorough understanding of the impact and challenges of technological advances in health and care. It will explore various perspectives of health and care professionals and consumers,

A (0)

This module aims to develop your leadership and management skills relating to effective decision-making in a health and care context. You will become equipped with the skills to collect, manipulate, interpret, and present data as an aid to business decision-making. The role of business analysis will be explored as a way to meaningfully contribute to health and care as a professional, practitioner, manager, or leader. The fundamentals of qualitative and primarily quantitative data collection will also be covered.

The concept 'quality' will be thoroughly explored in this module, with the ethos of striving for continuous quality improvement in health and care service delivery. You will become equipped with practical knowledge of management and outcome based care techniques that improve the quality of health and care services as well as benefit individuals and staff in care settings. The module will also provide a basis for understanding strategic and financial measures linked to organisational performance.

Created by the NHS Leadership Academy in conjunction with internationally renowned business and academic experts, this programme will prepare you for the demands of leadership in the healthcare system, both today and into the future. You'll gain the theoretical knowledge, practical understanding, and professional skills needed to thrive in a leadership role, coming out of the programme with an NHS Leadership Academy Award.
